SUMMARY

Cybersecurity analyst and purple teamer with 3+ years of experience securing AWS, Azure, and Microsoft 365 environments. Lead penetration testing for TiQHUB and its clients across AI systems, web applications, APIs, and cloud platforms. Combine offensive testing with incident response, control implementation, vendor risk assessments, and security automation.

EXPERIENCE

Cybersecurity Analyst | TiQHUB, LLC (Remote)

Oct 2023 - Present

- Lead a penetration testing team of three for TiQHUB and its clients, covering AI systems, web applications, APIs, and cloud environments across Azure, AWS, and Microsoft 365.
- Structure testing around OWASP and MITRE ATT&CK, following NIST SP 800-115 and PTES. Map remediation guidance to NIST SP 800-53 controls.
- Lead incident response from detection and triage through containment, eradication, and recovery. Maintain response playbooks and run tabletop exercises.
- Assess vendor and product risk before procurement through due-diligence reviews and security questionnaires. Review open-source tools for vulnerabilities, licensing, and supply-chain exposure.
- Harden AWS, Azure, Microsoft 365, and Windows and macOS endpoints using CIS, CISA, DISA STIG, and NCSC guidance. Apply zero-trust principles and automate checks with PowerShell and Bash.
- Implement and audit NIST SP 800-171 r2 controls across Azure and Microsoft 365, covering architecture, implementation, audit evidence, and continuous monitoring.
- Save time on security and administration by developing tools and scripts and integrating open-source tools into internal workflows. Select tools against organizational requirements.
- Run risk assessments, threat models, and user access reviews using NIST CSF and ISO 27001. Turn findings into remediation roadmaps and enforce least privilege.
- Maintain security policies, procedures, and registers, and deliver phishing and social-engineering awareness training. Coordinate security projects with engineering, IT, and business teams.

Cybersecurity Analyst (Trainee) | TiQHUB, LLC (Remote)

Jun - Oct 2023

- Built security playbooks using NIST SP 800-171 r2 and guidance from CIS and CISA.
- Hardened Microsoft 365 tenant configurations to reduce the external attack surface.
- Configured and secured Windows and macOS endpoints with Microsoft Intune.

TECHNICAL SKILLS

Purple team and offensive security: Purple teaming; AI, web, API, cloud, network, and Active Directory penetration testing; vulnerability assessment; remediation validation.

Security testing tools: BloodHound, Certipy, Impacket, NetExec, Sliver C2, Metasploit, Caido, Nmap, FFUF.

Cloud and identity: AWS, Azure, Microsoft 365, Entra ID, Intune, IAM, Azure RBAC, Privileged Identity Management, Conditional Access, Zero Trust.

Azure security and monitoring: Azure Firewall, Defender for Cloud, Defender for DevOps, Microsoft Sentinel, Log Analytics, Azure Policy, Key Vault.

Frameworks and methods: NIST SP 800-115, NIST SP 800-53, NIST SP 800-171 r2, NIST CSF, PTES, OWASP, MITRE ATT&CK, ISO 27001, ISO 42001, CIS, DISA STIGs, CISA, NCSC, Microsoft Cloud Security Benchmark, STRIDE, PASTA.

Automation and delivery: PowerShell, Python, Bash, Bicep, Azure DevOps, GitHub Actions, Claude-assisted workflows.

Assessment and endpoint tools: Maester, Prowler, ScubaGear, OpenIntuneBaseline, Robopack.

Security operations and governance: Incident response, threat modeling, secure code review, vendor risk, supply-chain security, user access reviews, audit evidence, security policies, tabletop exercises, awareness training.

SELECTED PROJECTS

Microsoft 365 & Windows automation

Custom tools and scripts that save time on Microsoft 365 and Windows security and administration. I integrate open-source tooling to fit organizational requirements and test changes before production use.

Azure cloud security projects

Azure lab projects covering identity, network security, monitoring, and secure delivery pipelines. The work is mapped to Microsoft Cloud Security Benchmark, CIS, NIST, and ISO 27001 guidance.

Home attack & defense lab

My lab for reproducing Active Directory attack paths and privilege escalation in Azure and AWS. I test web applications and APIs, then check defensive configurations against the same attacks.

CERTIFICATIONS

Certified Red Team Professional (CRTP) | Altered Security | May 2026

Certified Web Exploitation Specialist (CWES) | HTB Academy | 2026

Microsoft Certified: Azure Fundamentals (AZ-900) | Microsoft | Aug 2026

Microsoft Certified: Azure Administrator Associate (AZ-104) | Microsoft | Oct 2026

Certified Multi-Cloud Red Team Analyst (MCRTA) | CyberWarFare Labs | Nov 2025

Practical Junior Penetration Tester (PJPT) | TCM Security | Mar 2025

Google Cybersecurity Professional Certificate | Google / Coursera | Oct 2023

In progress: Microsoft SC-500

EDUCATION

Master of Computer Applications

SRM Institute of Science and Technology, Chennai | Jun 2026 | GPA 9.0 / 10

B.Sc. Computer Technology

Dr. SNS Rajalakshmi College of Arts and Science, Coimbatore | May 2023 | GPA 8.4 / 10
